

Read Me

The raw data files are in the data folder and the programming files are in the program files folder. There are in total 10 raw data files in the data folder downloaded from <https://www.sciencedirect.com/science/article/pii/S0169207019301530>. All the raw data are in .dta format. The R scrip is in the programming file.

Before running the R scrip, it is required to set the raw data folder as working directory.
